* This odometer reading was not used in this calculation because the difference was too small or it is in kilometer. When a reading difference is small, it is due to either a data entry error of the date of the odometer or a rounding of the odometer and not likely due to a true rollback.

This Vehicle's Glossary

Below are the specific definitions for events that appear in this vehicle's report. More information is available in the full AutoCheck glossary.

Term	Section Location	Definition
Loan/Lien	Other Title Brand and Specific Event Check	A loan/lien is the legal right to take and hold or sell the vehicle of a debtor as security or payment for a debt. Normally, a vehicle will have a lien due to a loan or unpaid repair bill against the vehicle. Check with the seller to ensure that the lien has been satisfied.
Personal Use	Vehicle Use	This vehicle was driven for personal use.
Accident	Accident Section	A state or municipality has reported an accident or collision for this vehicle that may or may not have sustained damage. Not all damage events are reported to AutoCheck and the damage severity of reported events will vary. In all events AutoCheck recommends that prospective vehicle purchasers conduct a detailed vehicle inspection prior to purchase of a pre-owned vehicle.
Open Recall	History Section	A recall is considered 'open' for a vehicle when it has not received the required service to correct the identified recall. The vehicle will need to be taken to a repair center that has been authorized by the manufacturer to correct any open recall conditions.
Recall	History Section	A safety, emission or bulletin issued by the vehicle manufacturer, the Environmental Protection Agency (EPA) or the Department of Transportation (DOT). These are different than a service bulletin. A recall involves work that must be done at no charge to the consumer by an authorized dealer of the vehicle make involved.
